INDEX TO IMAGING LITERATURE

An Index of 36 journals
in Diagnostic Radiology,
Interventional Radiology,
and Radiation Therapy

Finally. Total abdominal screening in less than 2 minutes.

PHILIPS MR

At Philips, the measure of a system is not only how fast it obtains an image. But also how much it improves diagnostic confidence. Expands clinical applications. And enhances throughput and efficiency. ■ By all measures, GYROSCAN S15/ACS is setting the standard in MR today. And in the process, expanding MR's role from advanced problem-solver to screening modality of choice. ■ Evaluate the S15/ACS for yourself. See how it eliminates motion artifacts in abdominal studies. Notice the superior contrast and resolution of its head and joint studies. And pay particular attention to today's most advanced cardio, angio and FAST Scan packages. ■ You'll understand why GYROSCAN S15/ACS is today's most promising platform for future MR developments. ■ For all the details, just call **1-800-999-5883, ext. 26.**

GYROSCAN S15/ACS will quickly and economically incorporate new applications and advances in technology thanks, in part, to this unique removable body coil.

FINDING THE ANSWER. MAKING IT WORK.

Foreword

The format of the *RSNA Index to Imaging Literature* for the years 1989 through 1991 is unchanged from the model of the past several issues. New terms are added every month in response to the developments in radiology. Terms without new entries for three years are dropped. On page 850 there are lists of terms that have been added and altered since the last edition was published.

The glossary of terms has proved useful. It is continued in this edition, beginning on page 829.

Two new publications, *Journal of Vascular and Interventional Radiology* and *Journal of Magnetic Resonance Imaging*, are welcomed to the roster of journals indexed. A list of journals added and deleted is found on page 850.

CLAUDIA J. GORMAN, *Index Editor*
STANLEY S. SIEGELMAN, MD, *Editor*
WILLIAM R. EYLER, MD, *Editor Emeritus*
